

# ANCHOR LÅS

Padlocks manufactured in Sweden since 1930

2025

ANCHOR LÅS AB is a privately owned lock manufacturer specialized in developing and manufacturing padlocks and locker locks. In our product range we can offer everything from locks suitable for the gym locker up to premium padlocks.

ANCHOR LÅS AB has a long tradition of developing and producing locks in Eskilstuna, Sweden. As more and more companies choose to place their production in low-cost countries, ANCHOR LÅS invests in its own production in Sweden. By gathering sales, product development and production locally, we can quickly adapt our products to meet our customers' requests.

By controlling our own production, we can stay flexible and guarantee that our products are of the highest quality. This, together with our experienced staff make us a valued partner and supplier.

We reserve the right to make changes to the catalog's content and range.

We also reserve the right for any printing errors and technical changes

## ANCHOR 880-4

Grade 5 padlock for very high security applications. Suitable for locking containers, train wagons, heavy sliding doors and the like. The padlock is equipped with the ANCHOR disc cylinder and 2 keys. The cylinder is protected by a 4.5mm thick hardened free spinning protection plate. The padlock is available in key differ (std), keyed alike or in masterkey system. Removable shackle is available as an option for applications with limited space.

### ANCHOR Disc cylinder

- > ANCHOR Disc cylinder, 9 discs, 1.5 million different key combinations.
- > The cylinder has no spring loaded parts, which in other types of mechanism can cause malfunction through wear, dirt, moisture, corrosion or freezing.
- > Maximum resistance against picking and manipulation.
- > The lock cylinder offers extensive masterkeying possibilities. All our padlocks and camlocks can be made to operate with just one key.
- > Our extra strong key, thickness 3 mm, is made of nickel silver. The key is design patented.

Use symbol  to insert key in correct position.

- > Padlock body: 70mm hardened steel
- > Shackle: 15mm hardened steel
- > Plating: Chrome
- > Cylinder type: ANCHOR Disc cylinder
- > Shackle heights: 27 and 50mm
- > Certification: Class 4 according to SSF 014 utg 3.  
Grade 5 according to EN 12320:2012
- > Options:
  - Carded (CARDED)
  - Removable Shackle (RS)
  - Keyed Alike (KA)
  - Master Key System (MK)
  - Excluding discs and keys (EXCL DISCS)
  - Completion of Keyed Alike (COMP KA)
  - Completion of Master Key System (COMP MK)

27/50	15	40	71	80	35

## ANCHOR 801-1 Oval IP68

A Grade 2 padlock for oval cylinders where the cylinder is protected according to the IP68 standard. Suitable for locking in tougher environments, e.g. hatches, appliance cabinets and switches where a thinner diameter of shackle is usually required. The padlock is designed for mounting the standard Scandinavian oval cylinder and is supplied with O-rings in the shackle holes and with a tight, fold-out flap over the cylinder. Hermetically sealed. The rubber sealing is delivered in black as standard, but is available in several different colors to simplify the marking of e.g. area, belonging etc.

Patented product.

This padlock is offered and manufactured on request.

A longer production time and a larger quantity are required for orders. MOQ 800 pcs

- > Padlock body: 60/51mm solid brass
- > Shackle: 5mm stainless steel
- > Plating: Chrome
- > Cylinder type: Oval
- > Shackle heights: 20mm & 50mm
- > Classification: Class 1 according to SSF 014 ed. 4.

Grade 2 according to EN 12320:2021

## ANCHOR 830-3 Oval IP68

A Grade 4 padlock for oval cylinders where the cylinder is protected according to the IP68 standard. Suitable for locking in tougher environments, e.g. hatches, road barriers, gates or similar. The padlock is designed for mounting the standard Scandinavian oval cylinder and is supplied with O-rings in the shackle holes and with a tight, fold-out flap over the cylinder. Hermetically sealed. The rubber sealing is delivered in black as standard, but is available in several different colors to simplify the marking of e.g. area, belonging etc. Patented product

- > Padlock body: 60mm hardened steel
- > Shackle: 11mm hardened steel
- > Plating: Chrome
- > Cylinder type: Oval
- > Shackle heights: 28, 35 & 50mm
- > Classification: Class 3 according to SSF 014 ed. 4.  
Grade 4 according to EN 12320:2021  
IP-class: IP68 Standard: EN 60529:1991  
+ A1:2000 + A2:2013. IEC 60529:1989  
+ A1:1999 + A2:2013.

- > Options: Extended (XL), D = 89 mm

A	B	C	D	E	F
28/35/50	11	28	79	60	25

Available with a longer padlock body (XL)

## ANCHOR 848-4 Oval IP68

A strong Grade 5 padlock for oval cylinders where the cylinder is protected according to the IP68 standard. Suitable for locking in tougher environments, e.g. containers, warehouses, gates or similar. The padlock is designed for mounting the standard Scandinavian oval cylinder and is supplied with O-rings in the shackle holes and with a tight, fold-out flap over the cylinder. Hermetically sealed. The rubber sealing is delivered in black as standard, but is available in several different colors to simplify the marking of e.g. area, belonging etc. Patented product.

- > Padlock body: 70mm hardened steel
- > Shackle: 15mm hardened steel
- > Plating: Chrome
- > Cylinder type: Oval
- > Shackle heights: 27 & 50mm
- > Classification: Class 4 according to SSF 014 ed. 4.  
Grade 5 according to EN 12320:2021  
IP-class: IP68 Standard: EN 60529:1991  
+ A1:2000 + A2:2013. IEC 60529:1989  
+ A1:1999 + A2:2013.

- > Options: Extended (XL), D = 97 mm

## ANCHOR 850-5 Oval IP 68

A very strong Grade 6 padlock for oval cylinders where the cylinder is protected according to the IP68 standard. Suitable for locking in tougher environments, e.g. containers, gates, construction equipment, critical infrastructure or similar. The padlock is designed for mounting the standard Scandinavian oval cylinder and is supplied with O-rings in the shackle holes and with a tight, fold-out flap over the cylinder. Hermetically sealed. The rubber sealing is delivered in black as standard, but is available in several different colors to simplify the marking of e.g. area, belonging etc.

Patented product.

- > Padlock body: 70mm hardened steel
- > Shackle: 15mm hardened steel
- > Plating: Chrome
- > Cylinder type: Oval
- > Shackle height: 27mm
- > Classification: Class 5 according to SSF 014 ed. 4.  
Grade 6 according to EN 12320:2021  
IP-class: IP68 Standard: EN 60529:1991  
+ A1:2000 + A2:2013. IEC 60529:1989  
+ A1:1999 + A2:2013.

## ANCHOR 560-3 EP IP68

Correct image coming soon!

A Grade 3 padlock for Euro profile cylinders where the cylinder is protected according to the IP68 standard. Suitable for locking in tougher environments with medium security, e.g. storehouse, sheds, small gates or similar. The padlock is designed for mounting the standard single euro profile cylinder and is supplied with O-rings in the shackle holes and with a tight, fold-out flap over the cylinder. Hermetically sealed. The rubber sealing is delivered in black as standard, but is available in several different colors to simplify the marking of e.g. area, belonging etc. Patented product

- > Padlock body: 60mm Solid brass
- > Shackle: 8mm Stainless steel
- > Plating: Chrome
- > Cylinder type: Single Euro profile (uncut)
- > Shackle heights: 15, 25, 60, 110mm
- > Classification: Class 2 according to SSF 014 ed. 4.  
Grade 3 according to EN 12320:2021  
IP-class: IP68 Standard: EN 60529:1991  
+ A1:2000 + A2:2013. IEC 60529:1989

## ANCHOR 510-1 Switch lock

The smallest padlock on the market suitable for oval cylinder. Specially design for infrastructure projects, safety switches, appliance cabinets and for locking points where a thinner shackle is required. Unique padlock with patented design and wide range of options. Prepared for mounting mechanical or electromechanical cylinder with fixed driver.

*Shorter screws must be used when mounting iLOQ's cylinder*

*Item no: 2283013*

- > Padlock body: 40mm brass
- > Shackle: 5mm Stainless steel
- > Plating: Solid brass
- > Cylinder type: Oval
- > Shackle height: 20mm och 50mm
- > Classification: Ungraded

- > Options:
  - O-ring sealed (EL)
  - Cover black
  - Cover red

## ANCHOR 530-3 Block Lock

A block lock in a smaller format. Designed for mounting the standard Scandinavian oval cylinder. Suitable for locking containers, gates, shutters and chains. The end knob of the shackle is designed to break during an attack to further increase the security. As an alternative there is a Utility version, which is made to optimize price performance rather than finish.

- > Padlock body: 60mm hardened steel
- > Shackle: 10mm hardened steel
- > Plating: Chrome
- > Cylinder type: Oval
- > Shackle heights: 11,5mm
- > Classification: No grade
  
- > Options: Utility

## ANCHOR 350 Series

Ungraded padlocks manufactured in brass with shackle in hardened steel. Suitable for locking lockers, toolboxes, and the like with limited security needs. Cylinder of pin cylinder design. Spring-loaded shackle. The key can be withdrawn in both locked and unlocked position. Padlocks 350-25 and 350-35 have 4 pins, padlocks 350-45 and 350-60 have 5 pins.

- > Padlock body: Brass
- > Shackle: Hardened steel
- > Plating: Brass on body, chrome on shackle.
- > Cylinder type: Pin cylinder
- > Shackle heights: See table.
- > Option: Carded (CARDED)  
Keyed Alike (KA)  
2 x Pack (TW)

Hasp 921 combined with an ANCHOR 590-6 RS padlock to meet grade 6 requirements.

## ANCHOR Hasp 921 & 923

Very heavy-duty hasp certified according to SSF018 class 5 and EN 12320 grade 6. The complete hasp is manufactured in hardened powder coated steel. When completely assembled the padlock, shackle is fully integrated in the hasp. Should be used with ANCHOR 590-6 RS to meet grade 6 and ANCHOR 840-4 PS RS to meet grade 5 requirements.

Assembly kit (bolts, washers, nuts) included. Fits padlocks with shackle size up to 15mm in diameter.

- > Dimensions: 130 x 78 mm
- > Plate thickness: 6 mm
- > Shackle hole: To be used with max 15mm shackle diam.
- > Plating: Black powder coating
- > Certification: Class 5 according to SSF018 rev 3  
Grade 6 according to EN 12320:2012

A **right-hand** door has hinges on the right when you open it.

A **left-hand** door has hinges to the left when you open it.

## ANCHOR Hasp 901 & 903

Heavy duty hasp certified according to SSF018 class 3 and EN 12320 grade 4.

The complete hasp is manufactured in hardened powder coated steel.

Assembly kit (bolts, washers, nuts) included. Fits padlocks with shackle size up to 15mm in diameter.

- > Dimensions: 130 x 78 mm
- > Plate thickness: 6 mm
- > Shackle hole: To be used with max 15mm shackle diam.
- > Plating: Black powder coating
- > Certification: Class 3 according to SSF018 rev 3  
Grade 4 according to EN 12320:2012

A **right-hand** door has hinges on the right when you open it.

A **left-hand** door has hinges to the left when you open it.

## ANCHOR 960-3 Shared locking

A strong and weatherproof Grade 4 padlock designed for shared locking. This innovative padlock is designed as a lockable fitting with a sliding bolt and a fixed knob, making it easy and convenient to handle the locking for shared access. The design allows for controlled and secure use, which is particularly practical in situations where multiple parties share access to the same area, such as road barriers crossing or area gates where multiple parties need access.

- > Padlock body: 60mm hardened steel
- > Shackle: 11mm hardened steel
- > Plating: Chrome
- > Cylinder type: Fixed knob
- > Shackle heights: 28mm & 50mm
- > Classification: Class 3 according to SSF 014 ver 4.
  - > Requires locking with 2 padlocks
  - SSF014 class 3

Grade 4 according to EN 12320:2021

- > Requires locking with 2 padlocks
- EN12320 grade 4

A	B	C	D	E	F
28/50	11	24	54	60	25

- > Options: Loop
- Padlock chain

## ANCHOR Hasp 950

Heavy duty hasp manufactured in hardened powder coated steel. Designed with concealed screw fixing. Assembly kit (screws, washers, nuts, drill) included. Fits padlocks with shackle size up to 14mm in diameter.

- > Dimensions: 230 x 75 mm
- > Shackle thickness: 12 mm
- > Shackle hole: To be used with max 14mm shackle diam.
- > Plating: Black powder coating
- > Certification:

## ANCHOR Hasp 940

The complete hasp and staple are manufactured in hardened galvanized steel. Designed with concealed screw fixing. Fits padlocks with shackle size up to 11mm in diameter.

- > Dimensions: 125 x 44 mm
- > Shackle thickness: 8.5 mm
- > Shackle hole: To be used with max 11mm shackle diam.
- > Plating: Galvanized

## ANCHOR Shackle shield 915

ANCHOR Shackle shield 915 protects small shackles from being cut off by a bolt cropper. The Shackle shield can be used with a variety of padlocks of 35-40mm in size, but we suggest it to be used in combination with the ANCHOR 410-1 padlock. The shackle protection is recommended to be used on lockers placed in public areas such as gyms, swimming areas, schools, etc.

Assembled according to below illustration.

- > Dimension: 70 x 48 mm
- > Material: Stainless steel

## ANCHOR CYLINDER COVER IP68 OVAL

Cylinder cover IP68 is solid climate protection for oval cylinders. Effectively protects against road salt, dust, moisture and freezing in challenging environments. The protection is easily mounted as a cylinder ring and has a flexible dimension thanks to the supplied distance rings. The weather cover comes with a black rubber seal as standard. Yellow, blue, red and green seals are available on request.

- > Diameter : 69mm
- > Length: 40mm incl. cover
- > Material: Inside brass, ring in stainless steel
- > Classification:
  - IP-class: IP68 Standard: EN 60529:1991
  - + A1:2000 + A2:2013. IEC 60529:1989
  - + A1:1999 + A2:2013.

Distance "A"  
from door to  
front of cylinder

17 mm	0
18 mm	1mm
19 mm	2mm
20 mm	3mm
21 mm	1&3mm
22 mm	2&3mm
23 mm	1&2&3mm

For shims required, measure distance between door and front of cylinder. There should always be a gap of ~1mm between bottom of cylinder-ring and front of cylinder to allow o-ring to compress and seal towards door.  
Mount and tighten two M5 screws (not included) from inside of door  
Open the weather protection and mount the screw, align it with the gap in the cover.

## ANCHOR CYLINDER COVER IP68 XL OVAL

Cylinder cover IP68 XL is solid climate protection for iLOQ's cylinder and in those cases where the oval cylinder has a longer protrusion. Effectively protects against road salt, dust, moisture and freezing in challenging environments. The protection is easily mounted as a cylinder ring and has a flexible dimension thanks to the supplied distance rings. The weather cover comes with a black rubber seal as standard. Yellow, blue, red and green seals are available on request.

- > Diameter : 69mm
- > Length: 44mm incl. cover
- > Material: Inside brass, ring in stainless steel
- > Classification: IP-class: IP68 Standard: EN 60529:1991  
+ A1:2000 + A2:2013. IEC 60529:1989  
+ A1:1999 + A2:2013.

For shims required, measure distance between door and front of cylinder. There should always be a gap of ~1mm between bottom of cylinder-ring and front of cylinder to allow o-ring to compress and seal towards door. Mount and tighten two M5 screws (not included) from inside of door. Open the weather protection and mount the screw, align it with the gap in the cover.

## ANCHOR CYLINDER COVER IP68 Round

Cylinder cover IP68 is solid climate protection for round cylinders sitting in challenging environments. Effectively protects against road salt, dust, moisture and freezing. The inner part is fixed to the cylinder, whereby the cylinder ring itself is threaded, pulled tight against the door leaf and puts the inner part in tension slightly. The weather cover comes with a black rubber seal as standard. Yellow, blue, red and green seals are available on request.

- > Diameter : 79mm
- > Length: 42mm incl. cover
- > Material: Inside brass, outer ring stainless steel
- > Classification: IP-class: IP68 Standard: EN 60529:1991
  - + A1:2000 + A2:2013. IEC 60529:1989
  - + A1:1999 + A2:2013.

Mount cylinder protection tight against round cylinder, tighten the 3 stop screws.

Mount and tighten the outer ring until it seals towards door.

Open the weather protection and mount skrew, aling in gap in cylinder ring.

## ANCHOR COVER IP68

Fold out covers for Padlock IP68 and Cylinder cover IP68. The cover is delivered complete with screw with thread seal and hinge. The sealing is molded into the cover.

Black sealing is supplied as standard.

- > Length: 60mm
- > Material cover: Stainless steel
- > Material sealing: Silicon
- > Option: Red, Blue, Yellow & Green

## ANCHOR Weather Protection

The weather protection is made of a weather resistant special plastic which close tightly against the padlock body. The tight fit makes it difficult for dust and water to penetrate through the padlock cylinder side.

> Grade 4 fits ANCHOR 800-3, 830-3, 833-3, 834-4, KABA 313, iLOQ grade 4 gen 1 and EVVA EPS grade 4.

> Grade 3 fits ANCHOR 802-2 Oval, KABA 9022 and iLOQ grade 3 gen 1 **Note! Does not fit 802-2 Snowman.**

## ANCHOR Vandal ring

ANCHOR Vandal ring, a solid impact and collision protection in a universal design. Reinforced edge at the back to distribute force in the event of a lateral break. Fits most electronic cylinders with knob on the market. Delivered without M5 shear screw.

- > Outer diameter: 62mm
- > Inner diameter: 50mm
- > Material: Surface-treated brass
- > Cylinder type: Oval with knob
- > Classification: Unclassified

## ANCHOR Padlock chain

An attachment chain makes it easier to ensure that the padlock does not get mislaid while the object that it secures is open. The chain must not be used as part of a security installation. To be assembled during assembly of the padlock.

- > Length of chain: 500mm
- > Chain: 5mm diameter, steel.
- > Plating: Bright galvanized

## ANCHOR Padlock chain - retrofit.

An attachment chain makes it easier to ensure that the padlock does not get mislaid while the object that it secures is open. The chain must not be used as part of a security installation. Possible to retrofit on already assembled padlocks.

The retrofittable padlock chain consists of a wall mount, a chain, and a shackle bracket. These can be ordered separately or as a kit.

Anchor wall mount is used to anchor the chain to a wall or a beam.

Anchor shackle bracket is used to fasten the chain to the padlock shackle. The bracket is secured to the shackle with a rivet.

- > Length of chain: 400mm
- > Chain: 4mm diameter
- > Shackle of wall mount: 6.5mm diameter
- > Material: All components in stainless steel

## ANCHOR Camlock 890

A most reliable security camlock available for vending machines, coin boxes, slot machines, lockers, and other high security applications. The camlock fits doors with 16/19 hole and door thickness up to 7,5mm. The camlock holds 8 discs providing about 300.000 locking combinations. The cam is rotated 90 degrees and can only be removed in locked position. Right hand turning as standard and left hand on request. Two keys included as standard. In the carded packaging a catch is included. Cylinder drum, code discs and end nut made of brass. Cam, governor, nut lock washer and hex nut made of zinc plated steel. Cylinder housing made of chrome plated brass.

### **ANCHOR Disc cylinder**

- > ANCHOR Disc cylinder, 8 discs, 300.000 different key combinations.
- > The cylinder has no spring-loaded parts, which in other types of mechanism can cause malfunction through wear, dirt, moisture, corrosion or freezing.
- > Maximum resistance against picking and manipulation.
- > All our padlocks and camlocks can be made to operate with just one key.
- > Our extra strong key, thickness 3 mm, is made of nickel silver.

The key is design patented.

- > Locking body: Brass
- > Key: 3mm Nickel silver
- > Plating: Chrome
- > Cylinder type: ANCHOR Disc cylinder
- > Options:
  - Carded (CARDED)
  - Keyed Alike (KA)
  - Master Key System (MK)
  - Excluding discs and keys (EXCL DISCS)
  - Completion of Keyed Alike (COMP KA)
  - Completion of Master Key System (COMP MK)

## ANCHOR Camlock 892

A most reliable security camlock available for vending machines, coin boxes, slot machines, lockers, and other high security applications. The camlock fits doors with 16/19 hole and door thickness up to 22,5mm. The camlock holds 9 discs providing about 1.500.000 locking combinations. The cam is rotated 90 degrees and can only be removed in locked position. Right hand turning as standard and left hand on request. Two keys included as standard. In the carded packaging a catch and a fixing plate is included. Cylinder drum, code discs and end nut made of brass. Cam, governor, nut lock washer and hex nut made of zinc plated steel. Cylinder housing made of chrome plated brass.

### ANCHOR Disc cylinder

- > ANCHOR Disc cylinder, 9 discs, 1.5 million different key combinations.
- > The cylinder has no spring-loaded parts, which in other types of mechanism can cause malfunction through wear, dirt, moisture, corrosion or freezing.
- > Maximum resistance against picking and manipulation.
- > All our padlocks and camlocks can be made to operate with just one key.
- > Our extra strong key, thickness 3 mm, is made of nickel silver.

The key is design patented.

- > Locking body: Brass
- > Key: 3mm Nickel silver
- > Plating: Chrome
- > Cylinder type: ANCHOR Disc cylinder
- > Options:
  - Carded (CARDED)
  - Keyed Alike (KA)
  - Master Key System (MK)
  - Excluding discs and keys (EXCL DISCS)
  - Completion of Keyed Alike (COMP KA)
  - Completion of Master Key System (COMP MK)

## ANCHOR GREASE

ANCHOR LOCK GREASE is a high-quality lubricating grease with extremely good water resistance and optimized anti-corrosion features. The grease provides effective protection against wear and tear of the padlock's moving parts, e.g. actuators, balls and shackle holes.

Recommended temperature range -30°C to +120°C.

- > Contains: 30 gram
- > Size: 30 x 95mm
- > Option: 1-piece  
12-piece in box

## ANCHOR Keys

Keys for ANCHOR cylinders.
